Expansion of the Antibody Panel in Flow Cytometric B-NHL Immunophenotyping – Introduction of CD200

Dear Colleagues,

We would like to inform you that, as of 1 May 2025, we will routinely include the marker **CD200** in our antibody panel for flow cytometric immunophenotyping of B-cell neoplasms (B-NHL).

This addition is intended to enhance differential diagnostic accuracy, particularly in distinguishing chronic lymphocytic leukemia (CLL) from other mature B-cell lymphomas, such as mantle cell lymphoma.

If you are using remote laboratory data transmission (LDT), please note that new assignments may be required in your information system.

	Analysis abbreviation NEW
CD200+/CD19+ lymphocytes (% lymphocytes)	CD19CD200

If you have any questions, please feel free to contact:

Technical inquiries:

Ms. Cinderella Marks

Phone: +49 6221 3432-128

Medical inquiries:

Dr. med. Margot Thiaucourt

Phone: +49 6221 3432-502

Thank you for your understanding!

With kind regards,

Your team at MVZ Labor Dr. Limbach & Kollegen
