Heidelberg, 17.02.2026

Innolipa HBV resistance testing has been discontinued as of March 1, 2026

Dear Sender,

We are writing to inform you that the test we have been using for HBV resistance testing has been discontinued by the manufacturer. Therefore, we are unfortunately no longer able to offer this examination, effective immediately.

However, we are pleased to announce that we are already working on a successor solution. Starting **March 1, 2026**, we will be performing HBV resistance testing using a new method based on Next-Generation Sequencing (NGS) technology. This modern procedure will allow us to continue providing you with diagnostics at the forefront of science and technology.

We apologize for any inconvenience this transition may cause and thank you for your understanding.

Should you have any questions, please do not hesitate to contact us.

Sincerely,

Dr. med. Konrad Bode
